User Guide

Overview

The screenshot shows the SCANLiNK web application interface. At the top right is the SCANLiNK logo with the tagline 'Information on demand'. Below the logo is a navigation bar with links: 'Mobile Video Production', 'Contact us', 'Dashboard' (1), 'My Account' (2), and 'How to' (3). A user login area at the top left shows 'Welcome: support@scanlink.com.au' and a 'Logout' button. Below the navigation bar is a secondary menu with categories: 'Plant & Equipment', 'Location', 'Person/Business', 'Product', 'Procedure', 'Misc', 'URL Link', 'Form/Survey/Checklist', and 'Exhibit'. A status legend indicates 'Expired' (red), 'Expires within 30 days' (orange), and 'Active' (green). The main content area features a search and sort section (5) with a 'Sort By' dropdown, a search input, and buttons for 'RENEW SELECTED CODES' (6) and 'ADD A NEW CODE' (7). Below this is a table of code profiles. The table has columns for 'Misc No.' (8), 'Code Profile Name', 'Code expiry date' (10), 'Select' (11), and 'Tools' (9). Two rows are visible: one for 'Form Builder Tutorial' (Misc No. 485, expiry 04/12/2014) and one for 'Participant List Tutorial' (Misc No. 423, expiry 13/11/2014). The first row is highlighted in green, indicating it is active.

- 1 Code profile list pages
- 2 Edit user details, Master code list view, Code balance, Purchase codes, Renew codes
- 3 Tutorial videos
- 4 Code profile menu and preview function
- 5 Code profile list search and sort functions
- 6 Code renewal function
- 7 Create a new code profile function
- 8 Code identification number
- 9 Code profile tools - Edit, Analytics, Form Responses, Code download, Order labels, Visitor log, Delete
- 10 Code expiry/renewal date
- 11 Code selector for individual code renewals

My Account Functions

'My Account' Menu overview

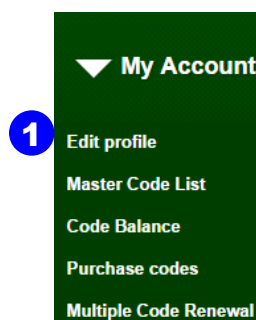

The screenshot shows the 'My Account' menu in the top navigation bar. The menu is expanded, showing the following options: Edit profile, Master Code List, Code Balance, Purchase codes, and Multiple Code Renewal. Below the menu, there are buttons for 'RENEW SELECTED CODES' and 'ADD A NEW CODE'. The main content area displays a list of codes with columns for 'Plant & Equipment', 'Location', 'Code', 'Status', 'Expires', and 'Action'. A search bar and sort options are also visible.

Callouts explain the functions:

- Edit profile:** Edit primary account user information. Add/edit additional account users
- Master Code List:** Displays a complete list of all code profiles
- Code Balance:** Displays a list of all unallocated codes available
- Purchase codes:** New code purchase page
- Multiple Code Renewal:** Renew multiple code subscriptions

Edit Account User Information

1. Click 'Edit profile' to open the edit page

2. Edit each field as required and click 'SUBMIT' to save any changes

The 'Edit Profile' form contains the following fields:

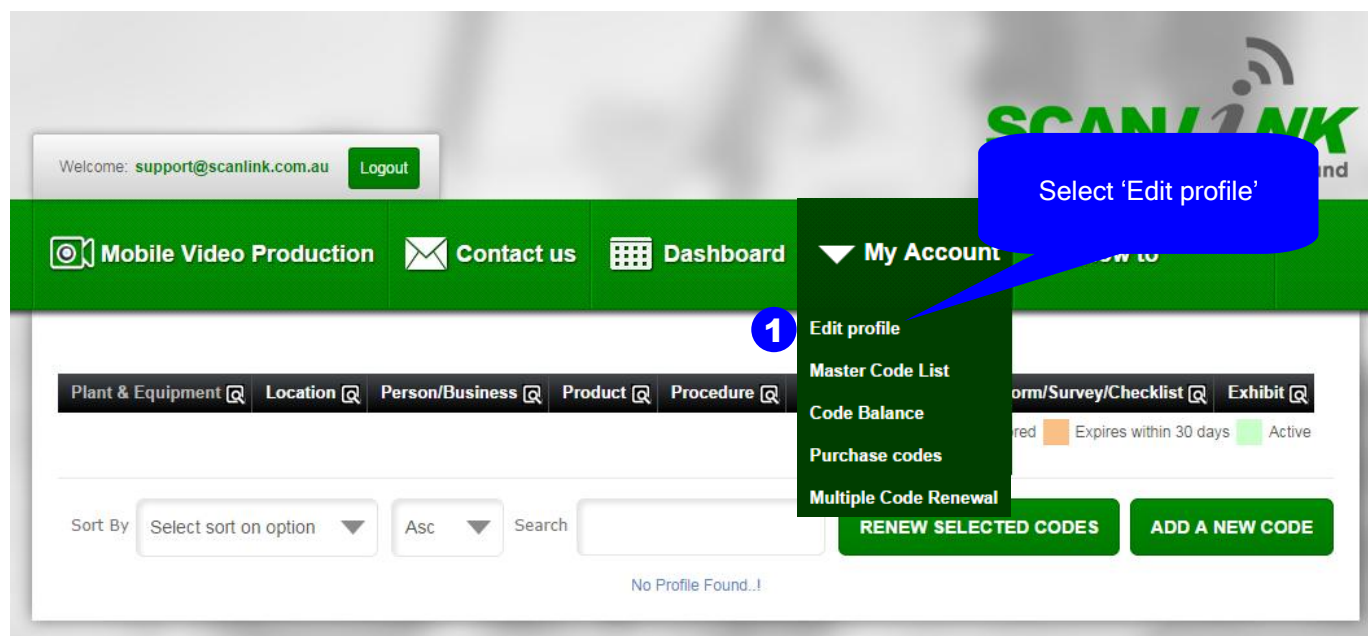

- First name: Demo
- Last name: Demo
- Company name: Scanlinkdemo
- Billing address: 10 Tinsel Street
- Email (this will also be your username): support@scanlink.com.au
- Town: Kyneton
- Telephone number: 1300566696
- Postal code: 3444

A green 'SUBMIT' button is located at the bottom left of the form, with a blue circle and the number 2 next to it.

My Account Functions

Add/Edit additional users

1. Click to open the 'My Account' drop down menu and select 'Edit Profile'

2. Scroll down to 'Add User' and enter an email address and password for the additional new user. This will serve as the new users login details. Once entered click 'SUBMIT'

The screenshot shows the 'Add User' form. It has fields for 'Email' (containing 'newuser@email.com') and 'Password' (containing '*****'). A blue callout bubble points to the 'SUBMIT' button with the text 'Add new user login details & click 'SUBMIT''. Below the form, there is a 'Manage User' section with a table showing 'Email' and 'Tools' columns. The table is empty, with the text 'No users found' at the bottom.

My Account Functions

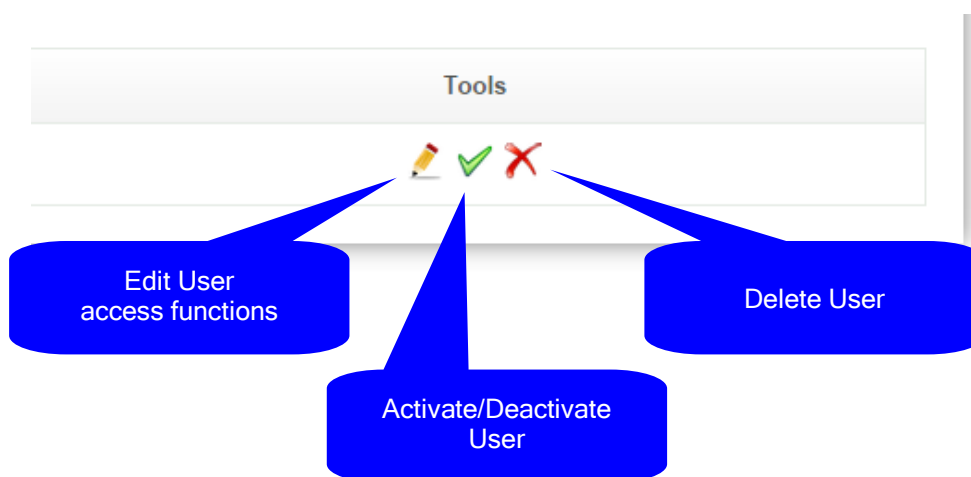

Add/Edit additional users.../cont

3. After clicking 'SUBMIT' the new user will be saved and added to the 'Manage User' list

The screenshot displays a web interface with three main sections:

- Change Password:** Contains three input fields labeled 'Old password:', 'New password:', and 'Confirm new password:', each followed by a green 'SUBMIT' button.
- Add User:** Contains two input fields labeled 'Email:' and 'Password:', followed by a green 'SUBMIT' button.
- Manage User:** A table with two columns: 'Email' and 'Tools'. The 'Email' column contains the text 'newuser@email.com'. The 'Tools' column contains three icons: a pencil, a green checkmark, and a red X. A blue speech bubble with an exclamation mark points to the 'Tools' column header.

4. There are three edit functions for each additional account user

Purchase/Register new codes for your account

There are two options for registering new codes...

OPTION1

1. Click 'Code Balance' in the 'My Account' drop down menu

2. Enter the quantity of codes you wish to register and click 'Calculate'

The screenshot shows the 'Purchase Codes' form. The 'Agency/Reseller' tab is selected. A text input field labeled 'Enter a number of codes required:' has the number '1' entered. A green 'CALCULATE' button is next to it. To the right, the price is displayed as '\$12.00 Per Code / Month' and 'Total Annual subscription \$144.00'. A green 'PURCHASE' button is at the bottom right.

3. The total annual subscription cost will appear.

4. Click 'Purchase' to proceed to the order summary page

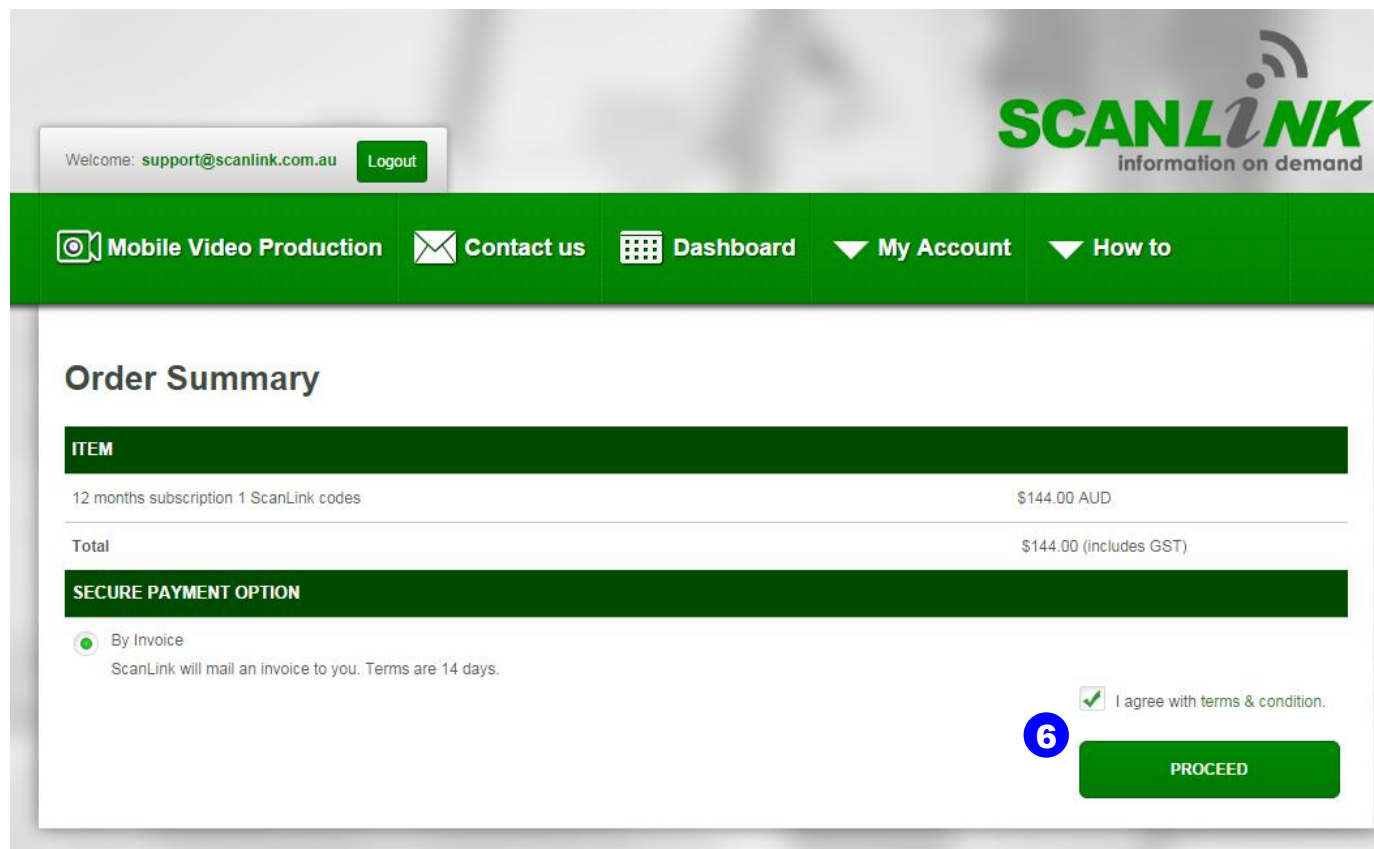

The screenshot shows the 'Billing Details' form. It has two columns of input fields. The left column contains: 'First name:' (Demo), 'Company name:' (Scanlinkdemo), 'Email(this will also be your username):' (support@scanlink.com.au), and 'Telephone number:' (2147483647). The right column contains: 'Last name:' (Demo), 'Billing address:' (10 Tinsel Street), 'Town:' (Kyneton), and 'Postal code:' (3444). A green 'NEXT' button is at the bottom left.

5. Confirm the billing address is correct and click 'NEXT'

Code Profile Management

Delete a Code Profile

When deleting a code profile, all content, recorded data and analytics will be deleted.
The code will be returned to your code balance ready to be allocated to a new task/profile.

To delete a code profile...

1. Click the delete icon under the tools menu for the code profile to be deleted

2. A pop up message will appear to confirm the deletion. Click 'OK'

3. The code will be returned to your code balance

Building Content

Each code profile template is made up of a series of different content tiles to facilitate uploading and editing different types of content such as logo's, videos, documents, text, pictures, forms, etc. Content will appear on the mobile display in the same order as each tile is featured on the profile template except for the 'Exhibit' profile template, where content tiles can be re-arranged using the click and drag function. Each content tile is optional.

The code profile name identifies the code profile and appears next to the code number on the profile list

Building Content

Upload a Logo or Graphic

Uploading a logo or graphic to appear on a code profile is a simple two step process. Before uploading, ensure any excess space is cropped around the image.

1. Click 'Select' and select the logo/graphic image to be uploaded.

2. Click 'Upload' to upload the logo/graphic.

- Acceptable file types for logo/graphic uploads are JPG, PNG, GIF.
- The maximum file size allowed is 4MB however it is important to note that the smaller the file size the faster images will load.
- Reduce the file size where possible to ensure optimal mobile user experience.

Building Content

Uploading Video

ScanLink utilises YouTube as a staging source for video. Videos are embedded in the code profile so that only videos uploaded can be viewed on the mobile display. Multiple videos can be featured on a single code profile.

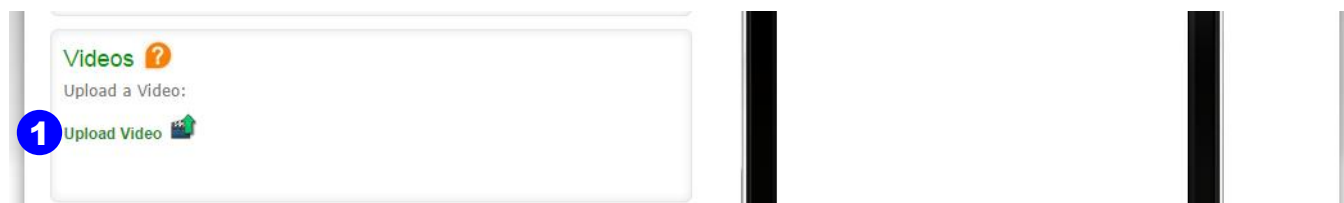

There are three options available for adding video to a code profile.

OPTION 1 - Upload a video from a file location in a computer or a storage device (USB, CD, etc)

OPTION 2 - Link an existing video already featured on YouTube

OPTION 3 - Select a video currently featured on another code profile

1. Click 'Upload Video'

2. The video upload window will open presenting the three upload options

A screenshot of the video upload window. The window is titled 'SCANLiNK Information on demand'. It contains three main sections:

- 1 Upload New:** This section has a 'Video Title:' text input field, a 'Select File:' section with a 'Choose file' button and the text 'No file chosen', and a green 'UPLOAD VIDEO' button.
- 2 Provide Existing Youtube Video Detail:** This section has a 'Video Title:' text input field, a 'Video Url:' text input field, and a green 'SAVE VIDEO' button.
- 3 Select From Existing:** This section shows a list of existing videos. The first item is '1. Form Builder Profile # 485' with a small video thumbnail. To the right of the list are 'REMOVE' and 'SELECT' buttons.

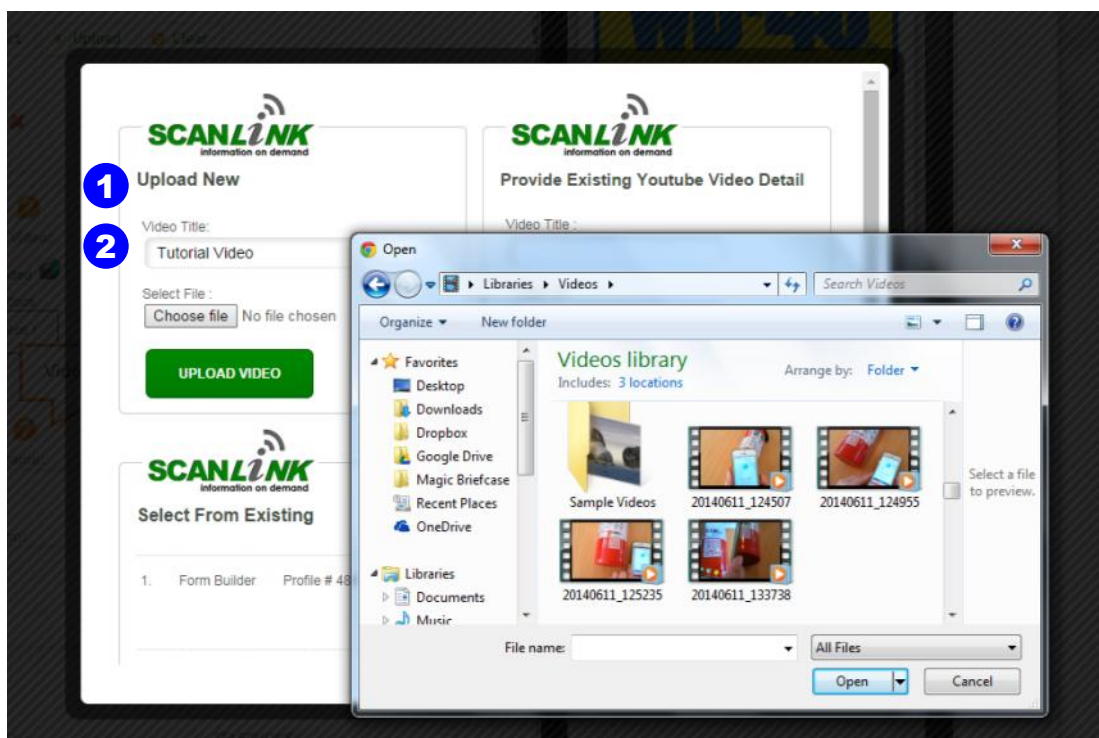

The window has a close button (X) in the bottom right corner.

Building Content

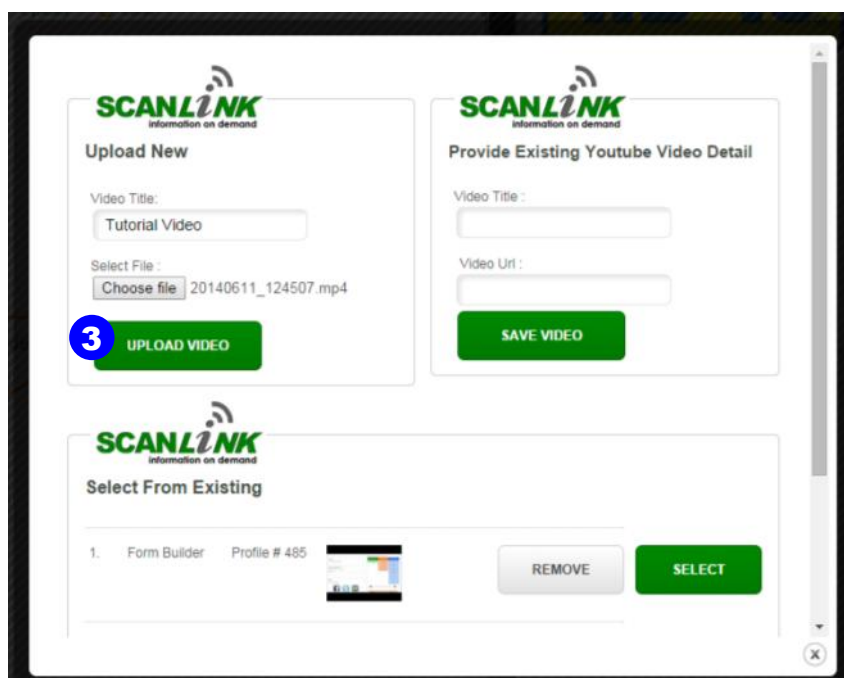

Uploading Video

OPTION 1 - Upload a video from a file location in a computer or a storage device (USB, CD, etc)

1. Enter a title for the video
2. Click 'Choose file' to identify the video you wish to upload

2. Once the video file has been selected click 'Upload Video'

- The upload duration is subject to the video file size.
- Do not attempt to close the video upload window before the process is complete.
- A confirmation message will appear when the upload is complete

Building Content

Uploading Video

OPTION 2 - Link an existing video already featured on YouTube.

Note that only videos listed on YouTube with embedding enabled can be added

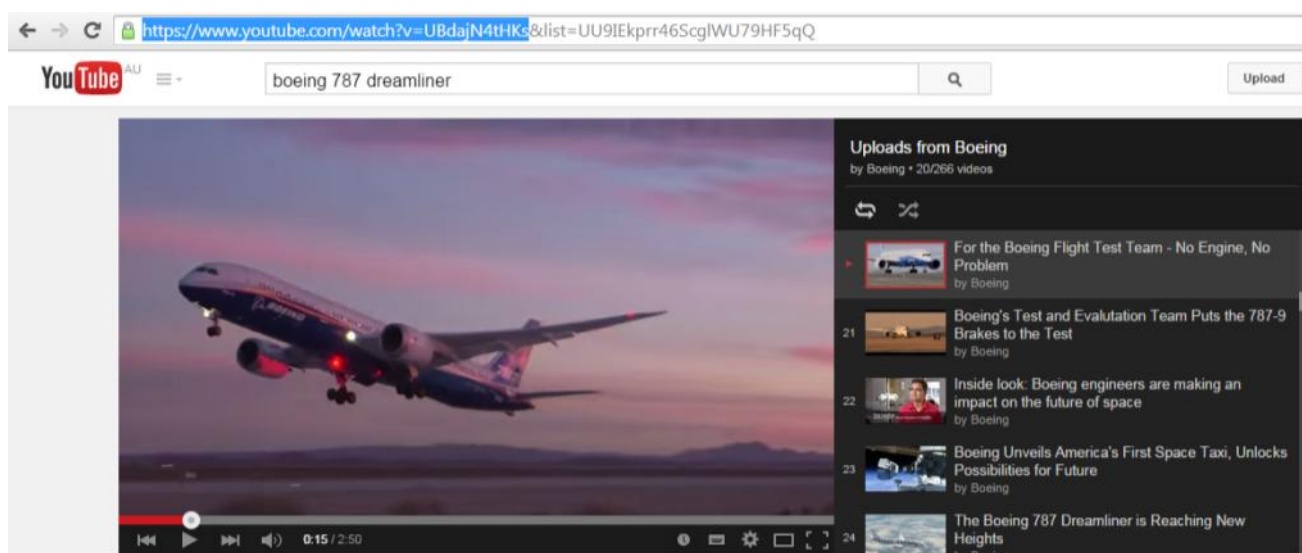

1. Enter a title for the video
2. Enter (copy & paste) the YouTube URL for the video
3. Click 'SAVE VIDEO'

A screenshot of the SCANLiNK 'Provide Existing Youtube Video Detail' form. The form has two main sections: 'Upload New' and 'Provide Existing Youtube Video Detail'. The 'Provide Existing Youtube Video Detail' section contains a 'Video Title' field with the text 'Tutorial Video' and a 'Video Url' field with the text 'https://www.youtube.com/w'. There are blue circles with numbers 1 and 2 pointing to these fields respectively. Below the 'Video Url' field is a green 'SAVE VIDEO' button. The 'Upload New' section has a 'Video Title' field, a 'Select File' button, and a green 'UPLOAD VIDEO' button. At the bottom, there is a 'Select From Existing' section with a table listing items and a green 'SELECT' button.

- For videos listed on YouTube in a feature roll, only enter the first part of the URL before the '&' character

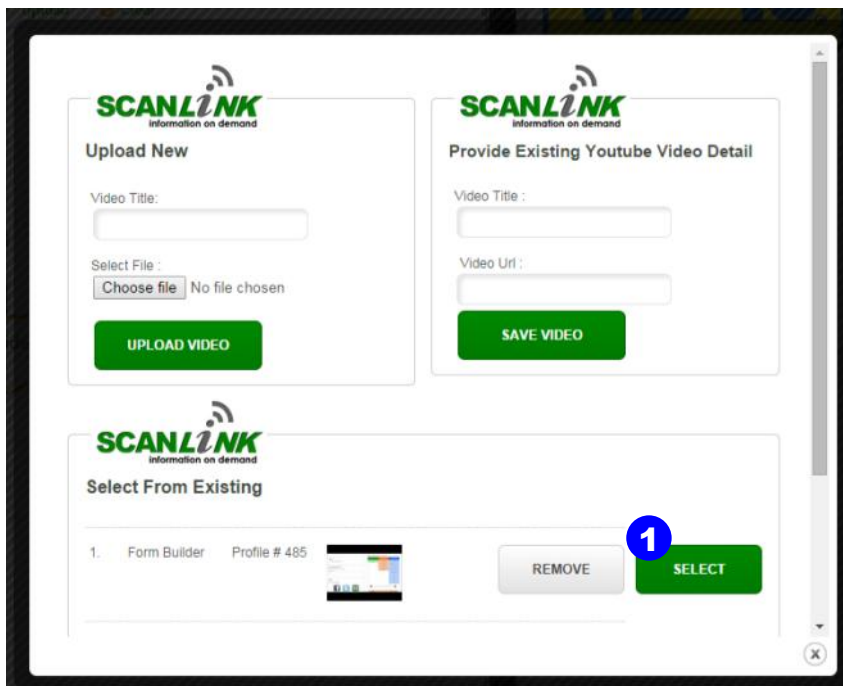

Building Content

Uploading Video

OPTION 3 - Select a video currently featured on another code profile

1. Scroll down to make a selection from a list of videos that are currently featured on other code profiles.

The screenshot displays the SCANLINK 'Select From Existing' video selection interface. It features three main sections: 'Upload New', 'Provide Existing Youtube Video Detail', and 'Select From Existing'. The 'Select From Existing' section shows a list of videos with a 'SELECT' button highlighted by a blue circle with the number 1.

Video Title	Video Url	Actions
1. Form Builder Profile # 485		REMOVE SELECT

- Always remember to click 'SAVE' at the bottom of the profile template to ensure videos are added successfully

Building Content

Adding text

A variety of text editing tools are featured.

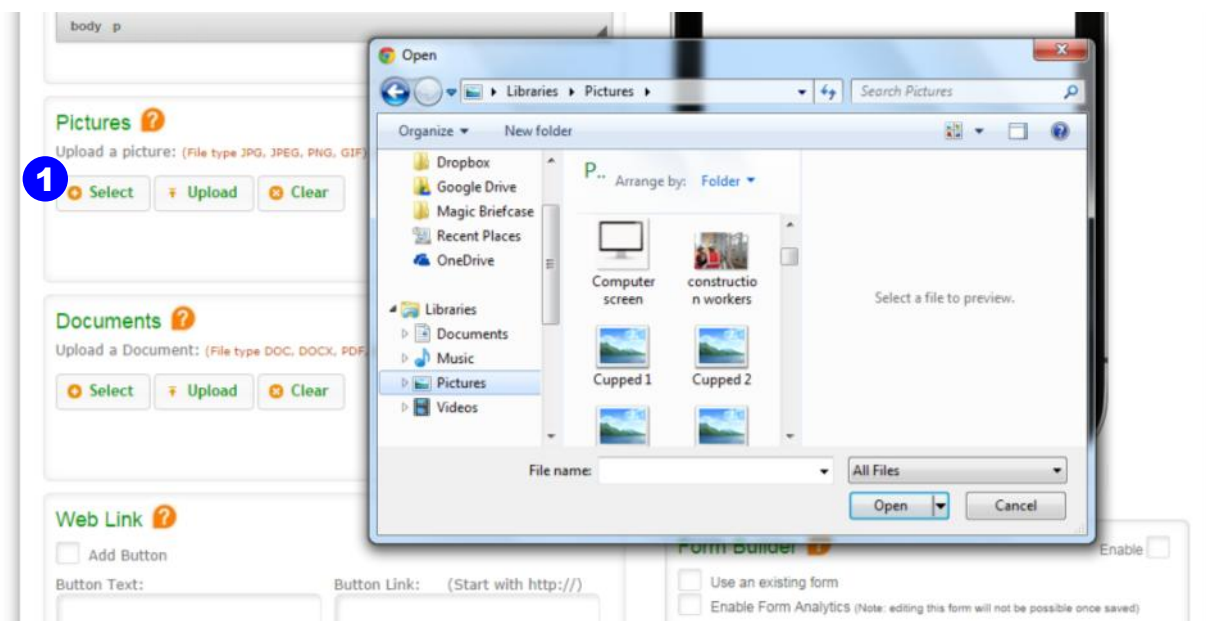

1. Once editing the text field is complete, click 'SAVE' at the bottom of the page to save the text to the profile

Uploading pictures

Uploading pictures to appear on a code profile is a simple two step process.

1. Click 'Select' and select the image to be uploaded.

- Always remember to click 'SAVE' at the bottom of the profile template to ensure videos are added successfully

Building Content

Uploading pictures

2. Enter any footer text to appear with the image (optional)
3. Click 'Upload'. Multiple images can be added and will appear on the mobile display in the order upon which they have been uploaded

- Acceptable file types for picture uploads are JPG, PNG, GIF.
- The maximum file size allowed is 4MB however it is important to note that the smaller the file size the faster images will load.
- Reduce the file size where possible to ensure optimal mobile user experience.

Building Content

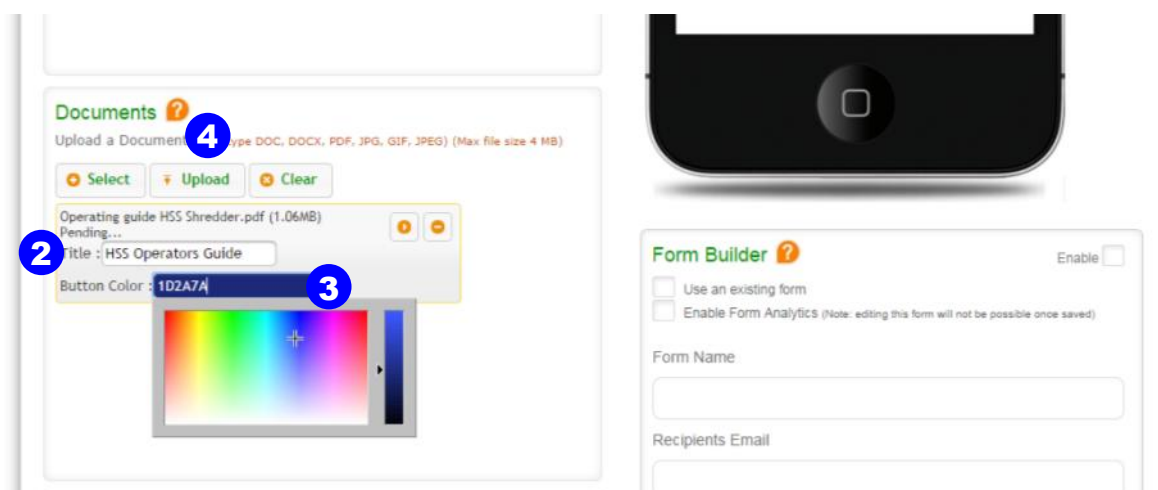

Uploading Documents

Uploading a document is a simple two step process. Documents are accessed by mobile users via a download button.

1. Click 'Select' and select the document file to be uploaded.

2. Enter the text to be featured on the document download button
3. Select a button colour
4. Click 'Upload' to upload the document

- Acceptable file types for document uploads are JPG, PNG, GIF, PDF, DOC, DOCX
- The maximum file size allowed is 4MB however it is important to note that the smaller the file size the faster images will load.
- Reduce the file size where possible to ensure optimal mobile user experience.

Building Content

Adding Web Link Buttons

Multiple buttons directly linked to individual URL's can be featured.

1. Click the 'Add Button' check box on the Web Link content tile
2. Enter the text to be featured on the web link button
3. Enter the URL destination
4. Select a button colour
5. Further web link buttons can be added by clicking the green 'ADD ANOTHER' button

The screenshot shows a 'Web Link' configuration panel. At the top, it says 'Web Link' with a question mark icon. Below this is a checkbox labeled 'Add Button' which is checked, with a blue circle '1' next to it. Underneath the checkbox are two input fields: 'Button Text:' containing 'Visit our website' (with a blue circle '2' next to it) and 'Button Link URL: (Start with http://)' containing 'https://www.scanlink.com.au/' (with a blue circle '3' next to it). Below these is a 'Button color:' section with a color picker showing a blue swatch with the hex code '202C7A' (with a blue circle '4' next to it). To the right of the color picker is a green button labeled 'AND ANOTHER WEB LINK' with a blue circle '5' next to it. Below the color picker is a rainbow color selection tool.

- You can also add hyperlinks to text in the 'Words' content tile

Building Content

Data Collection - Pop Up Window

The Data Collection function enables you to create a pop up window with a customised message that appears over the mobile profile display as soon as a code is scanned.

There are 4 optional Data Collection fields available - first name, surname, phone number and email address.

When enabled, the data collected is stored against the code profile under the 'Visitor Log'

1. Click 'Yes' to enable the Data Collection Pop Up function
2. You can set the data collection fields as mandatory requiring mobile users to complete each field before they can proceed to access the profile display. Check the box to activate.
3. Select the data fields that you wish to display
4. Type your message. There is a 150 character limit to ensure pop up messages fit on smaller mobile screens.

Building Content

Setting the code type

ScanLink generates Quick Response codes and Data Matrix codes.
Either code type can be generated for each code profile.

QR Code

Data Matrix Code

1. On the 'Set Code Type' content tile select QR Code or Data Matrix Code (default setting is QR)
2. Then click 'SAVE' at the bottom of the edit screen to save the code setting.

Set Code Type ?

Code Type: ☒ QR Code ☐ Data Matrix

What's the difference between a QR code and a Data Matrix code?

- A Data Matrix code can store up to 2,335 alphanumeric characters
- A QR code can store up to 4,296 alphanumeric characters

- See page 43 for code download instructions

Code Number Display

The code identification number can be featured at the top of the mobile display.
The default setting is off. To enable, tick the box under the 'Header' content tile.

Header ?

☐ Display the code number at the top of mobile screen

Building Content

User Access Security

Access to code profiles can be protected by setting a password or pin.

This means that when a mobile user scans a protected code they must enter the correct password or pin to access the code profile content.

Passwords can be alpha, numerical or a combination of both.

1. To enable, select 'Yes' on the User Access Security content tile
2. Enter a password or pin and then click 'SAVE' at the bottom of the edit screen to save.

User Access Security ?

1 Password protect?: ☐ Yes ☒ No

Password:

2

Add/Edit Participant List ?

The Participant List function enables you to add a list of people required to submit a form by a particular due by date. In the event that a listed participant does not submit a form response by their due by date an email alert is automatically generated and sent to one or several email addresses nominated to receive notification.

The email address for receiving notifications of overdue form submissions

Individual participants can be added manually or lists can be uploaded from a spreadsheet file. When uploading, the list must feature two columns...

1. One column featuring names (person or company, etc)
2. A due by date for each listed participant.

Code Download

How to download a code

You can download a code (QR or Data Matrix) at any time in several file formats

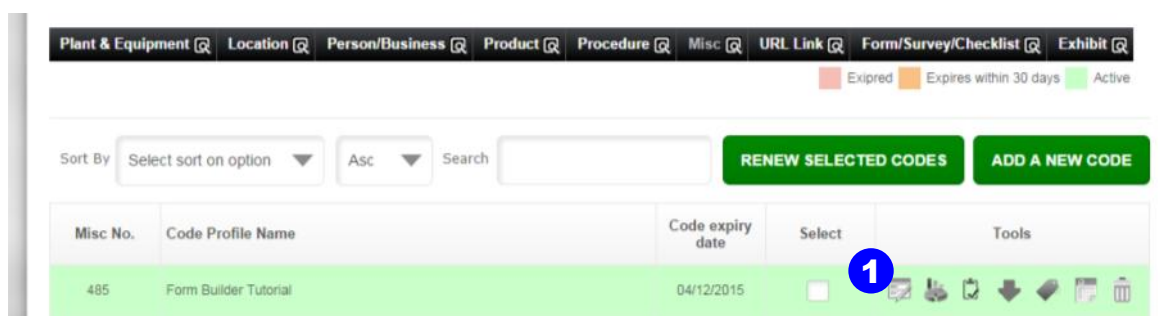

- PDF
- TIFF
- EPS (Vector)
- PNG
- JPG

You can quickly download a PDF file by clicking the download icon under the code profile tools menu

For more download file options...

1. Click the 'Edit' icon to open the code profile

2. Next to the code, click 'Download As' and select the file type

3. Click 'DOWNLOAD'

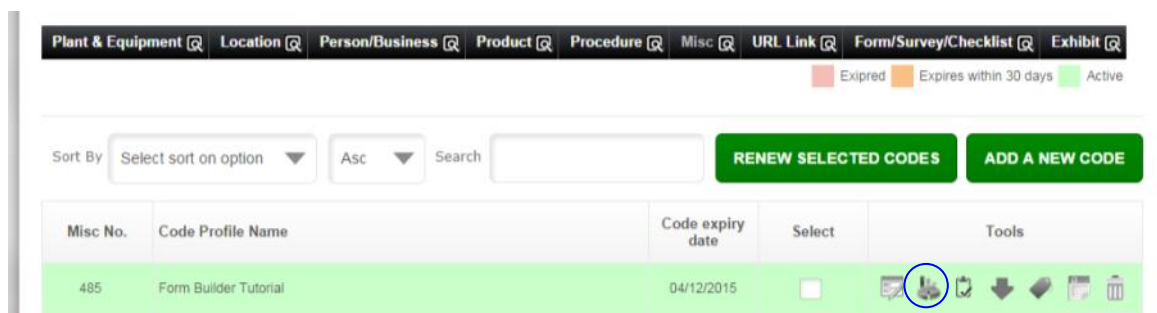

Analytics

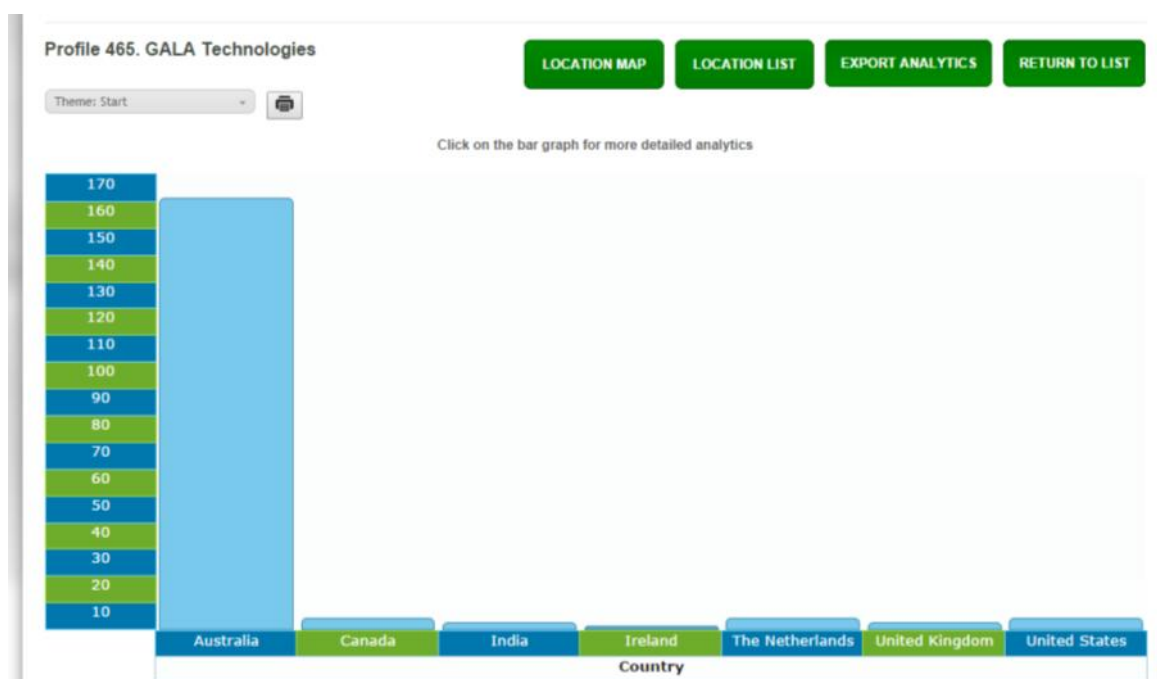

How to view, download and print code profile engagement records

ScanLink has a suite of comprehensive analytics functions that record scan activity presented as bar graphs and data logs that can be viewed, downloaded and printed any time.

1. To access analytics for a code profile click on the graph icon under the tools menu

2. The first graph features the total scan count by country

3. Scan activity by state and town can be viewed by clicking each bar

Label Printing—DuraLabel PRO300

Printing codes on pre-printed label supply

To ensure codes are printed consistently in the same position on pre-printed label supply, the DLP300 printer reads black calibration marks printed on the underside on the label supply.

To calibrate...

1. With the power OFF, hold down the orange feed button and turn the printer ON
2. Watch the LED light blink, it will blink RED 5 times, AMBER 5 times, GREEN 5 times, then begin to alternate GREEN/AMBER 5 times.
3. Release the button after the LED blinks GREEN/AMBER twice in a row.
4. The printer will feed a small amount of label supply while it calibrates.

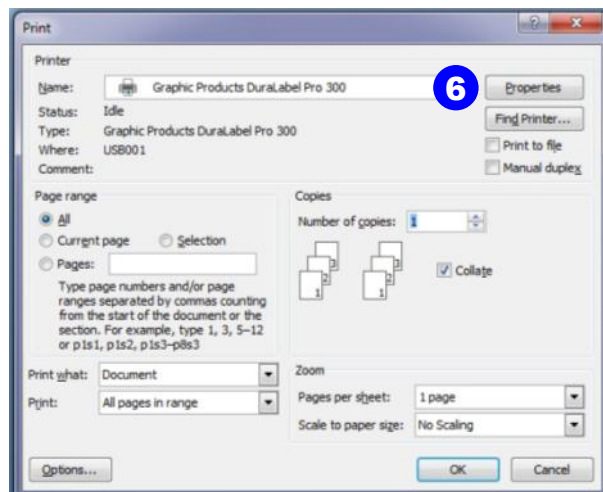

5. Open your label file using Microsoft Word or DuraSuite and click 'Print'

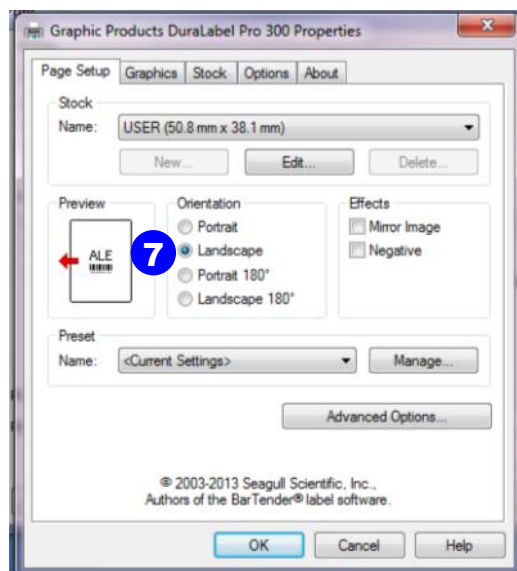

Label Printing–DuraLabel PRO300

Printing codes on pre-printed label supply.../cont

6. Select the DuraLabel PRO300 printer and click 'Properties'

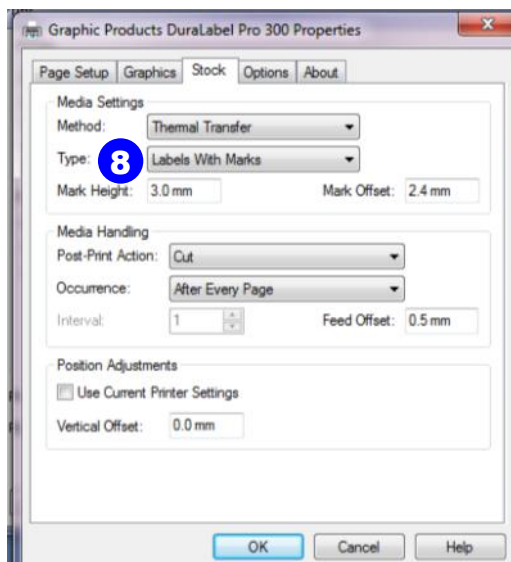

7. Under the 'Page Setup' tab set the Orientation to Landscape

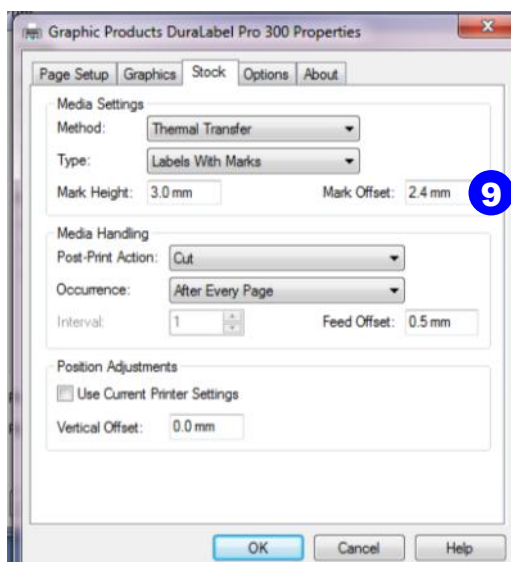

Label Printing–DuraLabel PRO300

Printing codes on pre-printed label supply.../cont

8. Click the 'Stock' tab and set the type to 'Labels With Marks'

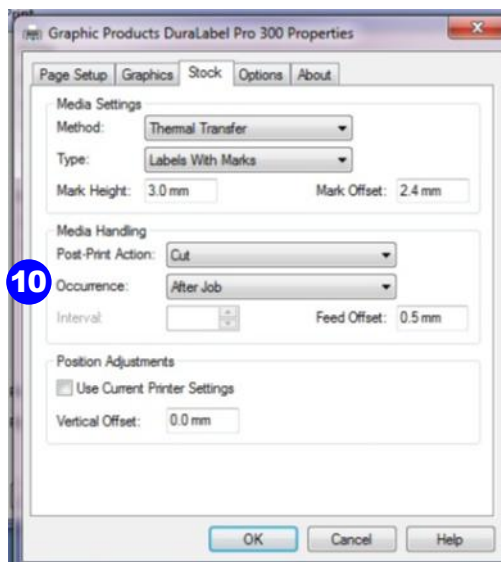

9. Set the 'Mark Offset' to 2.4mm (This setting may require adjustment according to the first print result.)

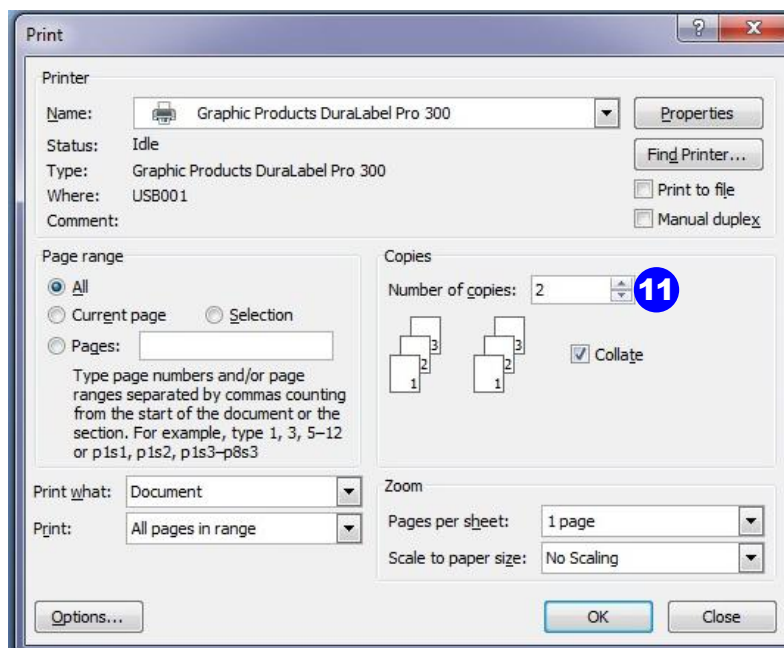

Label Printing–DuraLabel PRO300

Printing codes on pre-printed label supply.../cont

10. Set the 'Post-Print Action' to 'Cut' and the Occurrence setting to 'After Job' then click 'OK'

11. To enable the printer to read two full calibration marks select 2 copies to print

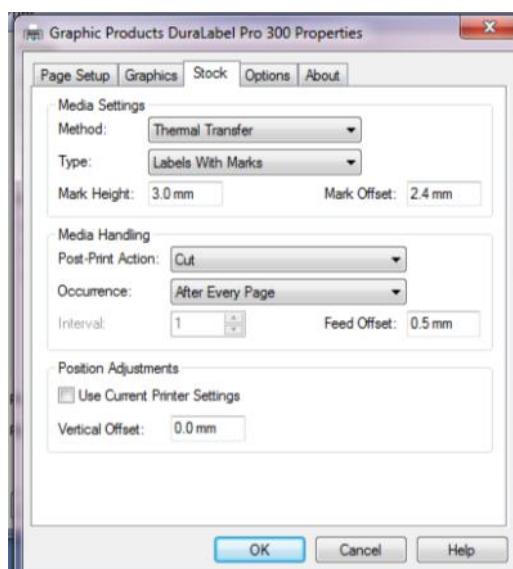

Label Printing–DuraLabel PRO300

Printing codes on pre-printed label supply.../cont

12. If the cut off position is OK then change the Occurrence setting under the 'Stock' tab to 'After Every Page' before printing further labels to ensure that each label print is cut.

If the cut position requires adjustment return to step 9 and repeat the process.

Rules of engagement - QR Codes

Before implementing any mobile QR Code initiative it's important to understand why smartphone users scan QR Codes. The key driver of the smartphone boom is convenience and Quick Response codes provide Smartphone users with quick and easy access to information on the go. So in order to maximise the success of any QR code initiative there are some important best practices to follow...

1 Call to Action

Always provide mobile consumers with a reason to scan your QR code.
A simple instruction such as "*Scan here to...*" prompts people to take action.

2 Deliver what people are looking for

If your call to action is something like "*Scan here for our special offers*" don't link your QR Code to the home page of your website. Link your code directly to your special offers.
This is what your call to action is saying and why people have scanned your code.

3 Mobile optimised content

Have you ever visited a website on your mobile that was designed to appear on a desk top computer screen? Everything is too small, links and buttons don't function correctly and you've got to pinch and scroll to try view the content.
This is a common mistake that defeats the purpose of any mobile initiative... CONVENIENCE!
It is essential that any mobile QR code is always linked to mobile optimised content.

4 Analytics

What's the point of spending time and money on marketing initiatives that you can't accurately measure? GALA Technologies [ScanLink](#) and [Scan of the Day™](#) mobile QR platforms provide a comprehensive suite of user-friendly analytics tools that makes any mobile QR code initiative 100% accountable.
Live tracking records the date, time, browser type, device type and even the GPS location.

5 Size matters

It's important to consider where your QR code will be displayed and ensure that it's large enough to be scanned. As a general rule the minimum size of a QR code should be no less than 1.5cm x 1.5cm and should increase by 3cm for every metre of scanning distance.
